

You can now recycle your old electricals with us.

If you're buying a new electrical item, we will recycle your old one **for free**

Why recycle?

Unwanted electrical equipment is the UK's fastest growing type of waste.

Many electrical items can be repaired or recycled, saving natural resources and the environment. If you do not recycle, electrical equipment will end up in landfill where hazardous substances will leak out and cause soil and water contamination – harming wildlife and also human health.

We can help

We are pleased to offer our customers the chance to recycle their old electrical items.

Simply bring your old item into one of our shops and we will recycle it for you when you purchase a new equivalent product from us.

When buying online, you can follow our standard returns procedure to send us an equivalent item to one that you have purchased, within 28 days, for recycling.

Note: you will be responsible for the cost of the postage.

To remind you that old electrical equipment can be recycled, it is now marked with a crossed-out wheeled bin symbol. Please do not throw any electrical equipment (including those marked with the crossed out wheeled bin symbol) in your bin.

What is WEEE?

The Waste Electrical or Electronic Equipment (WEEE) Directive requires countries to maximise separate collection and environmentally friendly processing of these items. In the UK, distributors (including retailers) must provide a system which allows all customers buying new electrical equipment the opportunity to recycle their old items free of charge. Those establishing their own take-back scheme must as a minimum offer all customers buying new electrical equipment free take back of their old electricals on a like-for-like basis.

Find more information on WEEE recycling, and locate your local recycling centre, at www.recyclenow.com.
